# ABOUT THE TAVOR TS 12

The TAVOR tactical shotgun TS12, 12 gauge tactical shotgun is a gas regulated bullpup shotgun that can be ordered for either right or left side ejection and operation.

It feeds from one of three magazine tubes which can hold four 3-inch shotgun shells or five 2 ¾ inch shotgun shells. This means that the potential magazine capacity is 15 rounds plus one additional round in the chamber.

The TAVOR tactical shotgun TS12 has a unique feature that automatically loads rounds in the chamber once the subsequent loaded tube is rotated into position. It can be fed and unloaded from either side.

Although the TAVOR tactical shotgun TS12 has a 470mm barrel, the overall length is still only 720mm. Currently, the TAVOR tactical shotgun TS12 will be offered in black with following versions offered in green and flat dark earth.

For a versatile and compact sporting or home defense shotgun, the TAVOR tactical shotgun TS12 is innovative and optimized for whatever application you need.

## FEATURES

- Internal muzzle threads accept both Beneli and Beretta choke. One choke will be included with each shotgun
- There is a one piece full length 1913 standard Picatinny top rail on the gun. M-LOK receptacles are incorporated into each side of the forearm of the shotgun body
- Tubular magazine system (5 - 2 ¾" or 4 - 3") 15 rounds total capacity
- 12 gauge gas operated smoothbore semi-automatic shotgun with integral gas regulation adjustment
- A unique patented "Bullhead" bolt system, specially designed for use with the TAVOR tactical shotgun TS12
- Cross bolt safety
- Disassembly from the rear without the use of any special tools
- 4 sling attachment points
